|---|---|
| S C Bell | Adviser |
| C E Foster | Editor |
| C Barnes | Associate Editor |
| Fred England | Humor Editor |
| H A Baskin | Printer |
| E G Martin | Feature Editor |

---

## ON TO ALABAMA!

The great day arrived for a few of the boys this week when the Cadre from this camp moved out. Orders came in Monday night, and the men left on Tuesday morning. They were as follows:

| | |
|---|---|
| Charlie Brock | 1st Sergeant |
| Walter Smith | Supply Sergeant |
| Wm. Hackney | Co. Clerk |
| D. C. Whitley | Steward |
| Russell Parrish | 1st Cook |
| Marshall Darris | 1st Cook |
| Nathan Barganier | Asst. Cook |
| Sandlan Murdock | Asst. Cook |
| F. C. Williams | Asst. Cook |
| Ebron P. Hartley | First Aid |
| Laurence Neel | Asst. Leader |
| Willis T. Miree | Asst. Leader |

Members George L. Martin, Oscar Phillips, Claude King, Olson Butterworth, Jack Austen, Clarence McVey, Harold Johnson, Norman Long, Horace Cobb, Arthur Estes, Cleve Willingham, John Mc Barnett, and Frank Arnold.

It was a sad blow to most of us to see the cadre go. It is hard to realize how much you can miss some big, loud-mouthed cluck like "Big-'Un." But, well, more power to them.

H. A. Baskin received a card from King who said that they arrived at Auburn about 11:00 A. M., Wednesday, having spent the night at Benning. He asks for a copy of the Pine Knot Journal as it is put out. So when you want to tell one of the boys something, just turn it in to the camp paper and they will hear about it sooner or later. Their new camp is about four miles from Auburn. The address is:

Company 4447 CCC
Camp Ala. S. P. S. 7
Auburn, Alabama

---

## FIRE HARS ALL

The fire inspectors for this area examined this camp last week. Fire extinguishers were tested and possible fire hazzards were noted. Conditions here were found okay.

## CO. DANCE HELD SUCCESSFULLY

It is with great pleasure that we report the successful operation of the dance Friday, August 2nd. It was well-attended enough to defray expenses. The music was good and most everybody enjoyed himself. There were no casualties as it was a very pleasant and orderly affair throughout. If none of our future parties descend below the level of this one, we feel sure that we have some mighty enjoyable occasions in store for us. The committee is to be congratulated on their management of the affair, at such short notice.

---

## RUMOR: DR. JOHN ----????

It is said that there is another physician in camp. Perhaps it is some famous surgeon masquerading as a CCC boy. As to that we cannot say. All we know is that we saw a package addressed to Dr. John F. ----, and before we could read the last name, some one snatched it from our grasp. Who can it be?

---

## LIGHTS & LIGHT PLANTS

The light plant was hors de combat most of last week. The troubles has been somewhat relieved, but things are still in an uncertain state. The magneto has been repaired and a new head has been installed. By the Grace of God and with the help of Providence our light service is confidently expected to be much better in the future.

## NEW FIRE RULES

Last Wednesday a new set of fire regulations was issued. In each of the barracks, on bulletin boards, and at other places, there are copies posted. The regulations were read to the entire company as well. It is to everyone's advantage to familiarize himself with these instructions so that he may take his proper place in event of fire. Fire drills are held from time to time to give practice in the carrying out of the rules. These are of great importance and should be carefully observed by all.

---

## THE CINEMA

Last week there was a delayed showing of that epic of the little unknown--the World War--"All Quiet on the Western Front." It was very interesting and instructive although presenting an opinion to be confirmed rather of murder stories. There were lifelike reels of war scenes and many movements of troops and were highly spectacular and most realistic. Such a picture should make all of us realize the full tragedy of war.

Educational films for the week have also been excellent. The first assignment had to be sent back without being shown as there were no lights. This past week we had one reel on the "Life of Ingersoll," and two reels on the "Ways of Speech." A good attendance was on hand for these latter films, and all enjoyed the show immensely.

---

## THE NEW CAMP

There is no news from the new camp. So far, construction is scheduled to start by the first of September. The company will probably move in as soon as construction is completed.

---

## FORESTRY PROJECTS

A new project has been opened up to our camp. The Kelly project lies on the other side of Sinclair's, near the Lafayette County line. The boys have been working on the new project since Monday. So far the work has consisted mainly of surveying and road building.

---

## NEW FORESTER

Riley Eddins, new forestry foreman, arrived in camp last week. He has been working the stump crew so far. We hope that he will like his work here, and that he will stay long enough to get acquainted.

---

## MALARIA SURVEY

Lt. Pomerance and Pvt. Grimes were in camp last week on an inspection tour. They conducted a malaria survey of the company by taking blood smears of all men in the company. Only three cases showed up, according to the Lt., and this speaks well for the fine preventive measures instituted by our camp surgeon, Lt. Neece. As the men are subject to mosquito bites at work, this is very good.

## MOSQUITO BARS

Some of the boys learned a sad lesson last Tuesday evening. They have been figuring that they are too mean for anything to bite them and have been forgetting to use their "skeeter bars". Well, Wednesday, a list of names appeared on the bulletin board, confining all men who were caught not using their bars to camp for a week. (We are using our bar every night now.) It is too bad that people do not take care of themselves without some official deterent. Anyone who has lived through a series of atabrine treatments knows what it means. Malaria is no joke. The old saw about the ounce of prevention can be taken to heart here

---

## HEALTH TALK

Wednesday evening Lt. Neece gave a health talk in the Recreation Hall. It was attended by the entire company. Dr. Neece discussed sex hygeince, particularly the prevention and care of venereal disease. He emphasized the grave consequences attendant to these diseases, the difficulty of treatment, and the life-long effects of some of these, such as blindness, rheumatism, insanity, paralysis, etc.

---

It is said that the early bird catches the worm. Yes, but look what happens to the early worm!

---

## SPORTS

A number of men in camp have been making a good showing in the fights held at Cherry Lake. In his last two fights, "Baldy" Hazlett has drawn one, and won the other. Gess and Butterworth have also been doing well in the square circle. Nick Fernandez and Rhodes have had much ring experience before coming to camp so we have plenty of talent here, but that the boys will all have to keep in better training if they expect to get far with the gloves.

Baseball is giving soft-ball a hard race as the camp's most popular sport. Last Saturday, the baseball team went to Tallahassee, where they lost to the Vilas CCC boys. Against Cherry Lake, Sunday, Co. 1410 won at soft-ball while the baseball club lost. Only a lucky last inning for Greenville, Thursday, kept us from annexing that game, but watch our speed in future games!

Competition among members of the Officers' Bath and Tennis Club is waxing better every day. Now that Charlie Brock and Hackney have left, Lt. Jones appears to be the ace on our company courts; however, several others are almost equally good.

---

## SCHOOL PLANS

John Dyer and Charles Foster visited Gainesville, Friday, where they made arrangements to enter the Univ. of Florida this fall. We surely hope that these two fellows have the best of luck at school.

## HOSPITAL NOTES

The following members of the company are confined in the Station Hospital at Ft. Benning: Willie Farmer, Mario Fernandez, Claude Steele, and Ralph Baty.

Townsend and Logue are confined to quarters.

---

## VISITORS

Major Hamilton Horn from Corps Area Headquarters inspected in camp this morning on a tour of inspection. With him came Major Tucker of the State Forestry Office in Tallahassee.

---

## FORESTRY CLASS MAKES TRIP

Prof. Bell left this morning with his forestry class on a field trip. While gone, he expects to point out some of the common varieties of trees and their distinguishing characteristics. Next week, it is planned to take the class on a tour of one of the Perry lumber mills.

---

## DISCHARGED

Ogden Smith, Assistant Leader on the tractor crew, was discharged this week to accept employment with a construction company.

---

Ben Lovingood, 1st Sergeant, was called home this week on account of illness in his family.
